

53rd Avenue Pump Station
Public Meeting – Thursday, July 20, 2006
Alki Community Center, 7 p.m.

King County protects public health and the environment by conveying and treating the region's wastewater. Many of King County's wastewater facilities are more than 40 years old and do not meet current design standards. To ensure the safe and reliable operation of the 53rd Avenue Pump Station, King County must upgrade it starting in early 2007. The pump station is located at 53rd Ave. SW and Alki Blvd. It is an underground facility located under the pedestrian and bike way. The renovated pump station will pump 17 million gallons of sewage per day to the county's regional treatment plant at West Point in Seattle.

Please come to the Alki Community Meeting on Thursday, July 20, 2006 at 7 p.m. at the Alki Community Center located at 3010-59th Ave. SW to hear about the plans to renovate the pump station and learn about how this construction may affect you as a near neighbor of the facility.

Construction is expected to begin in early 2007 and last 20 months. King County is committed to working with the community to minimize impacts and keep you informed of progress. We will operate a 24 hour construction hotline, give you advance notice of work through mail, e-mail and door hangers and work with directly impacted residents.

For more information about the 53rd Ave. Pump Station upgrade project, please contact Martha Tuttle, Community Relations/Public Outreach, Wastewater Treatment Division, Dept. of Natural Resources and Parks at 206-684-1207 or e-mail her at martha.tuttle@metrokc.gov
